f. Institutional set-up for liquidity risk management

The Board of Directors has the overall responsibility of managing risk related to Asset Liability mismatches. The Board has constituted Asset Liability Management Committee ('ALCO') to identify & monitor liquidity. The Company's ALCO monitors asset liability mismatches to ensure that there are no imbalances or excessive concentrations on either side of the Balance Sheet, in accordance with the liquidity risk thresholds/ limits decided by the Board. The ALCO is comprised of MD & CEO (chairperson) and other senior management to enable effective ALM risk management strategy of the Company.

The Company has a Board approved Asset Liability Management policy 'ALM policy', defining the liquidity risk management framework in line with RBI's "guidelines on liquidity risk framework for NBFCs" which ensures that the Company maintains sufficient liquidity in line with the risk appetite framework, including a cushion of unencumbered, High Quality Liquid Assets to withstand a range of stress events, including those involving the loss or impairment of both unsecured and secured funding sources. The Board approves the prudential limits defined in the ALM policy. The Company is maintaining LCR in line with regulatory requirements from December 2020.

Notes:

- In order to strengthen and raise the standard of the Asset Liability Management (ALM) framework applicable to NBFCs, Reserve Bank of India ("RBI") has decided to revise the extant guidelines on liquidity risk management for NBFCs. RBI has issued a circular in that aspect vide circular RBI/2019-20/88, DOR.NBFC (PD) CC. No.102/03.10.001/2019-20 dated 4 November 2019 which requires NBFCs to adhere to guidelines of liquidity coverage ratio. Liquidity coverage ratio (LCR) standard is introduced in order to ensure that a NBFC's has an adequate stock of unencumbered high quality liquid assets (HQLA) to survive a significant liquidity stress lasting for a period of 30 days. LCR is defined as a ratio of HQLA to the total net cash outflows estimated for the next 30 calendar days. Total net cash outflows is defined as the total expected cash outflows minus total expected cash inflows for the subsequent 30 calendar days.
- As per the RBI guidelines, LCR requirement is at 85% from December 01, 2023.
- Liquidity management is driven by the ALM Policy, approved by the Board. The Treasury department of the Company reports to Asset Liability Management Committee (ALCO).
- The Company has HQLA in form of Cash balances, Government Securities & T-bills issued by Central Government. No haircut is required on these assets for the purpose of LCR as per RBI circular.
- Primary components of the outflows are repayment of existing debts, undrawn uncommitted lines, other contractual funding obligations, etc. Primary components of the inflows are collection from business receivables, fixed deposits with bank etc.
